

Are you a researcher working outside Spain?

Cádiz University, as part of **ESTEEM3** project provides free access to state-of-the-art Transmission Electron Microscopes.

FEI Cubed Titan Themis 60-300 TEM/STEM FEI Talos F200X

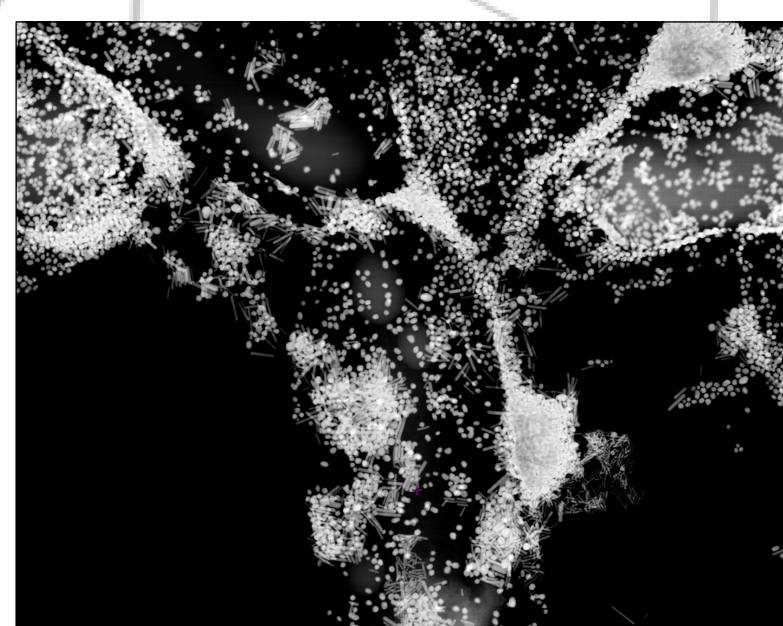

At the forefront of electron microscopy

That's not all ...

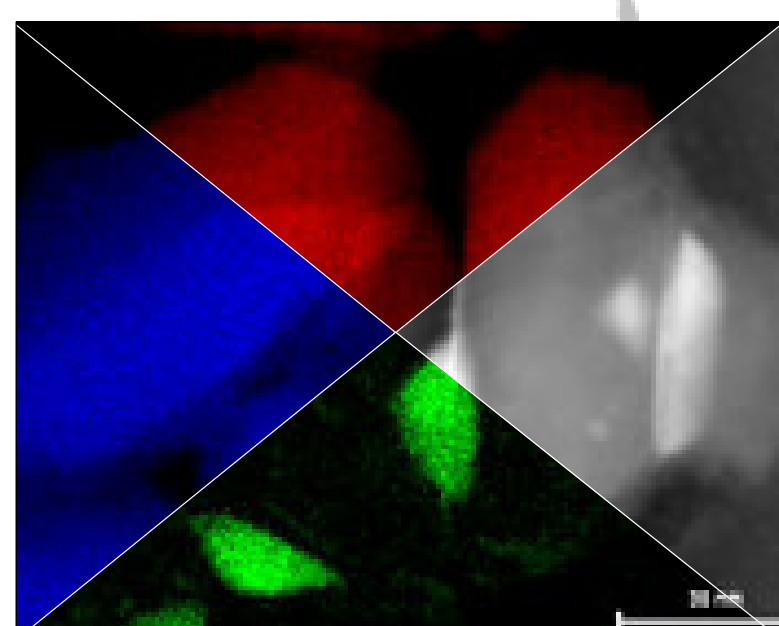

You will also have the support of **UCA** researchers who are highly specialized in advanced electron microscopy techniques. If needed they will also support you during the experiment and during data treatment.

For more information contact with Susana Trasobares at proyecto.esteem3@uca.es
